HIRANOMOE PRESENTS...

IKARYAKU #26

Hey guys,

This is Chrono_Tato, back writing on behalf of the HironoMoe translation group. Haven't written these for a while. After receiving a few letters from concerned translation note readers pertaining to my mysterious absence, I've been reinstated as the lead translation note writer. (That was a lie.)

So here is our release of Ikoryoku chapter 26 which I hope you've all enjoyed. This time we extend a special thanks to Red Jack, who helped with proof reading the chapter in order to check that the Fallout 3 references were all accurate. None of us Hirono Rangers have played the game, unfortunately, so much thanks to him for saving our behinds this time.

One reference that would probably be worth mentioning here is that the "Jet and Mentat" things are drugs from the Fallout universe. Other references should be relatively straight forward. It'd probably be better anyway if you guys just go play the game yourselves then have someone here sit you down and explain them all to you.

And now other news from the HironoMoe headquarters; progress is being made on the reconlation of the tankobon version of Hellsing Volume 10. Yes, in case you haven't already heard the news, we are doing the entirety of Vol. 10 again, which promises higher quality scans and, of course, the infamous new and edited pages. Look forward to it, Hellsing fans.

That's it for now, chaps. Keep safe and don't do drugs.
